

SILVERBACK STRONGBACK PIPE SUPPORTS

No Fabrication, Just Installation

SILVERBACK

STRONGBACK PIPE SUPPORT

5X Faster to Install!

****Available up to 10' lengths, for longer spans consult with our design department****

Strongback Silverbacks (SB's) come pre-assembled and require no cutting or welding. Our fully designed and engineered supports are provided as easy-to-adjust Trapeze to save you time during installation.

- **Costs Less than Structural Steel**
- **Off-the-Shelf Support**
- **Modular System as Strong as Fabricated Steel**
- **One Bolt Size for All Hardware Connections**
- **Installs with a Wrench**
- **Compatible with Unistrut Metal Framing**
- **Fully Adjustable Mechanical Connections**
- **Four-Sided Attachment**
- **Single Person Installation on Most Sizes**
- **Lightweight**

****For load requirements please contact our support team****

Modular Mechanical Supports

SERVICES

Modular Mechanical Supports

A Division of Eberl Iron Works, Inc.

No Fabrication, Just Installation

Our prefabricated mechanical supports are constructed out of Sikla modular structural support members and components, which are engineered to perform as a primary pipe support system.

Sikla Framo (siFramo) assembles five times faster than fabricated steel, and requires no on-site welding, drilling, or burning.

All hardware connections are made with the same size vibration-proof thread forming screw - which tightens into place with a standard, 20 volt impact driver - and are easy to adjust in the field, unlike welded connections.

Sikla is highly compatible with many other metal framing systems, such as Unistrut, and comes standard in a high corrosion (ISO C4 grade) finish.

Our Product Systems

- Strongback Pipe Supports
- Equipment Skids
- Multi-Trade Pipe Racks
- Adjustable MEP Pipe Support Frames

Services We Offer

- BIM Modeling
- Takeoff & Design
- Shop Drawings
- Engineering Stamps
- Product Kitting
- Prefabrication
- Product Training
- On-Site Assistance
- Project Planning
- Packaging & Delivery

Fully Engineered & Designed

Our team designs and engineers your supports, then supplies you with kits or pre-assembled frames for easy installation on your job site.

Our friendly and knowledgeable customer service staff is on hand to answer your questions, and to provide you with detailed product knowledge and training, product certifications and submittals, respond to quote requests, process orders, provide logistics support and anything else you might need.

Our dedicated project coordinators are on hand to assist you throughout every step of your custom project, from modeling, design, takeoff and delivery to completion.

Project Applications and Industries

- Multi-Trade Racks
- Equipment Skids
- Pipe Skids/Petrochemical
- MEP Support Frames
- Pump Skids/Pharmaceutical
- Access Platforms
- Ductwork Supports
- Wastewater Treatment
- Energy Plants
- Clean Room Manufacturing
