Multi-Trade Racks (Structural)

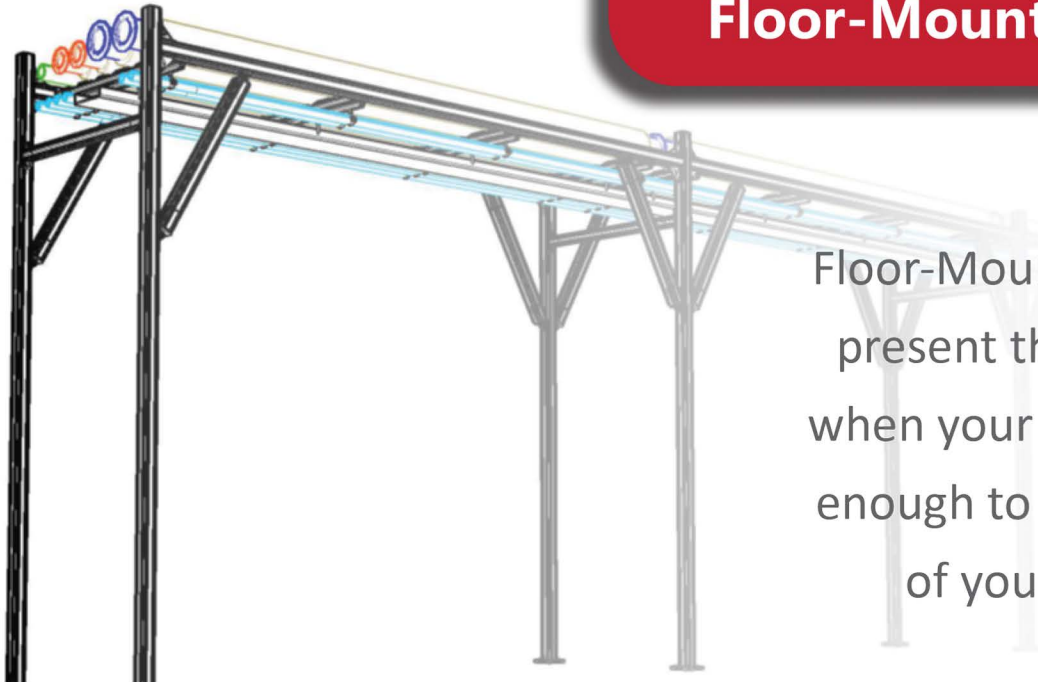

KEY SPECIFICATIONS

- 40ft Multi-Trade Racks
- 8ft Width, Up to 5ft Depth
- Up to 8,000 lb rating
(200 lb/ft Corridor Service Load)
- Modular Steel Chassis & Strut
Intermediates for Various Trades
- Lifting Lugs Side Mounted

Floor-Mounted Corridor Racks

Floor-Mounted Corridor Racks present the perfect solution when your ceiling is not strong enough to support the weight of your MEP systems.

Modular Mechanical Supports SERVICES

No Fabrication, Just Installation

Our prefabricated mechanical supports are constructed out of Sikla modular structural support members and components, which are engineered to perform as a primary pipe support system.

Sikla Framo (siFramo) assembles five times faster than fabricated steel, and requires no on-site welding, drilling, or burning.

All hardware connections are made with the same size vibration-proof thread forming screw - which tightens into place with a standard, 20 volt impact driver - and are easy to adjust in the field, unlike welded connections.

Sikla is highly compatible with many other metal framing systems, such as Unistrut, and comes standard in a high corrosion (ISO C4 grade) finish.

Project Applications Include

- Data Center Racks
- Hospital Corridor Racks
- Industrial Construction
- Semi-Conductor Industry
- Pharmaceutical Industry
- Automotive Industry
- Equipment Skids
- Pipe Skids/Petrochemical
- MEP Support Frames
- Multi-Trade Racks

EBERL
IRON WORKS, INC.®

Serving the Needs of Our Customers Since 1923

128 Sycamore Street
Buffalo, New York 14204
Toll-Free: (800) 285-3056
Local: (716) 854-7633
Fax: (716) 854-1184

Fully Engineered & Designed

Our team designs and engineers your supports, then supplies you with kits or pre-assembled frames for easy installation on your job site.

Our friendly and knowledgeable customer service staff is on hand to answer your questions, and to provide you with detailed product knowledge and training, product certifications and submittals, respond to quote requests, process orders, provide logistics support and anything else you might need.

Our dedicated project coordinators are on hand to assist you throughout every step of your custom project, from modeling, design, takeoff and delivery to completion.

Services We Offer

- Project Design
- Project Engineering
- Project Estimation
- Prefabrication/Assembly
- Product Kitting
